* Policy Board member

2005 Treasurer's Report

The Financial Statements of the Foundation appear on the following pages and have been audited by KPMG LLP.

The Bush Foundation's investment objectives and policies are designed to meet long-term goals for investment return and spending as established by the Investment Committee of the Foundation's Board of Directors. The Foundation's long-term investment objective is to achieve a rate of growth sufficient to allow the Foundation to meet its granting requirements (5 percent of average annual assets) and cover reasonable operating expenses while maintaining the inflation-adjusted principal of the fund.

The oversight, review and implementation of the Foundation's investment policy are the responsibility of the Investment Committee. An effective investment policy is essential in securing a reliable source of funds for the programs of the Foundation. The major responsibilities of the Committee are to determine in which asset classes the Foundation will invest (stocks, bonds, real estate, etc.), how those assets will be allocated and which external investment managers will do the actual investing. The Finance staff of the Foundation has daily responsibility for the portfolio. Jeffrey Slocum & Associates, Inc., the Foundation's investment consultant, assists the Committee and the staff by providing information regarding performance evaluation, investment manager selection, asset allocation and other advisory needs.

The Foundation's current asset allocation policy target for equities and equity-like investments is 45 percent, its allocation to fixed income securities is 15 percent and the remaining 40 percent of the portfolio is allocated to alternative investments such as real estate, venture capital and hedge funds.

Total assets of the Foundation were \$796 million at November 30, 2005, compared to \$732 million for

the prior fiscal year. The annualized total investment return for 2005 was 13.2 percent on a calendar basis. All segments of the financial markets in which the Foundation was invested earned positive return for the year.

Investment income for the year, which includes interest, dividends and other income, was \$13.7 million as compared to last year's income of \$11.4 million. Investment and administrative expenses were \$12.4 million, a \$4.4 million increase from the prior year's expenses of \$8 million; most of the increase was due to higher excise and unrelated business income taxes paid over the previous years. The Board approved \$33.4 million in new grant appropriations, net of cancellations, which was higher than the amount appropriated in 2004 of \$24.7 million. These appropriated amounts do not include the effects of discounting, which are reflected in grants payable on the financial statements. Grant payments during the year totaled \$30.3 million, as compared to \$31 million paid in 2004.

We anticipate that economic market conditions will continue producing positive investment returns for the Foundation over time that will more closely mirror long-term historical norms. This will ease our ability to meet our granting requirements and cover our operating expenses. Going forward, we will continue to explore potential avenues of enhancing return without exposing the portfolio to excessive risk, and to monitor our operations so that a positive outcome is generated for the Foundation and the region it serves.

Esperanza Guerrero-Anderson
Treasurer

Independent Auditors' Report

**Board of Directors
The Bush Foundation:**

We have audited the accompanying statements of financial position of The Bush Foundation (the Foundation) as of November 30, 2005 and 2004 and the related statements of activities and cash flows for the years then ended. These financial statements are the responsibility of the Foundation's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Foundation's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Foundation as of November 30, 2005 and 2004 and the change in its net assets and its cash flows for the years then ended in conformity with U.S. generally accepted accounting principles.

Notes to Financial Statements

November 30, 2005 and 2004
(In thousands)

1. Significant Accounting Policies

Organization

The Bush Foundation (the Foundation) is an exempt private foundation that provides grant support in the areas of education, humanities and the arts, human services, and ecological health to nonprofit organizations in Minnesota, North Dakota, and South Dakota, as well as two non-regional grant programs. In addition, the Foundation awards individual fellowship grants in the fields of leadership, art, and medicine to qualified applicants from the three-state region and western Wisconsin.

Basis of Accounting

The financial statements are prepared on the accrual basis of accounting in conformity with accounting principles generally accepted in the United States of America.

Tax Exempt Status

The Foundation is exempt from federal income tax under Section 501(c)(3) of the Internal Revenue Code (the Code) and is a private foundation as defined in Section 509(a) of the Code. The Foundation is subject to applicable state and federal unrelated business income tax and federal excise tax. A provision for unrelated business income tax and federal excise tax has been made and is included in the financial statements.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Foundation to make estimates and assumptions that affect the reported amounts of assets and liabilities and revenues and expenses during the year. Actual results could differ from those estimates.

Cash Equivalents

The Foundation considers all interest-bearing deposits and short-term investments purchased with maturities of three months or less to be cash equivalents.

Investments

Investments in securities that are traded on national or international securities exchanges are carried at fair value, based upon quoted market prices provided by external investment managers and the Foundation's custodian.

Fair values for investments held in alternative structures including limited partnerships, hedge funds, and limited liability corporations are estimated by the respective investment managers if quoted market values are not readily determinable. The estimated values as determined by the general partners and fund managers may differ from the values that would have been used had ready markets for the investments existed and the differences could be significantly higher or lower for any specific holding.

Derivative Financial Instruments

The Foundation invests in various stock indices, fixed-income, and foreign currency derivatives. The Foundation uses derivatives with the objectives of reducing portfolio risk and/or lowering investment costs. Derivative uses include managing the duration of the fixed-income portfolio, gaining investment exposure to specific markets, and maintaining investment policy allocation. Derivative instruments are measured at fair value and reported in the statement of financial position. Changes in the fair value are reported in the statement of activities.

The Foundation uses listed options contracts to reduce return volatility and enhance portfolio yield of designated equity holdings (the Option Overlay Program). The Option Overlay Program focuses on the Foundation's exposure to large-cap U.S. equity holdings and consists of four separate position phases. Each phase has a term of one year, covers approximately one quarter of the Foundation's large-cap U.S. equity exposure, and has an initial price cap target 15% above the quarter-end S&P index level.

The Foundation, in conjunction with its investment manager, has established risk management policies and procedures for the Option Overlay Program which are set forth in the Option Overlay Policy Statement executed between the Foundation and the investment manager. In addition, the Foundation, the investment manager, and its investment advisor apply portfolio management and monitoring techniques to monitor the Foundation's use of derivative instruments under the Option Overlay Program.

Fair Value of Financial Instruments

The carrying value of dividend and interest receivable, receivable and payable for securities with settlements pending, accounts payable, and accrued and other liabilities are reasonable estimates of their fair value due to the short-term nature of these financial instruments. Investments are stated at fair value. Grants payable have been stated at fair value by discounting multiyear grants.

Grant Appropriations

Grants are recorded as expense when approved by the Foundation's board of directors, except when the grants are conditional as defined by requirements of Statement of Financial Accounting Standards (SFAS) No. 116. Cancellations of grants occur principally when the grantees do not meet the grant terms. Cancellations were \$213 in 2005 and \$1,084 in 2004.

Classification of Expenses

Grants and expenses associated with the Foundation's direct charitable activities are considered to be program expenses, while all other expenses of the Foundation are considered to be management and general expenses.

Reclassifications

Certain reclassifications have been made to the 2004 financial statements to conform to the 2005 presentation, including furniture and equipment.

2. Securities Lending Transactions

Under a securities lending agreement, the Foundation has authorized the lending agent to manage and administer a securities lending program. The lending agent has the responsibility for negotiating the terms of each loan and for collecting the required collateral, which must be in the amount of 102% in the case of securities of U.S. issuers and 105% in the case of securities of non-U.S. issuers of the market value of any securities loaned, including any accrued interest. Collateral was invested in a short-term investment trust and was due to the investment borrower in accordance with the terms of the collateral agreement. As of November 30, 2005 and 2004, the securities lending program was temporarily suspended.

3. Federal Excise Taxes and Distribution Requirements

Federal Excise Taxes—The Foundation is subject to a 2% excise tax on its taxable investment income, which principally includes income from investments plus net realized capital gains (net capital losses, however, are not deductible). Tax on net investment income is reduced from 2% to 1% for any taxable year in which the Foundation's qualifying distributions meet certain requirements prescribed by Internal Revenue Code Section 4940(e).

The Foundation did not meet these requirements in 2005 and 2004. Accordingly, the 2005 and 2004 federal excise tax expense is based upon the 2% tax rate. Deferred federal excise taxes are based on the 2% tax rate and arise from unrealized appreciation in the market value of investments, as well as from differences in the recognition of income from certain investments. The deferred tax rate of 2% is being used because the Foundation expects the deferred tax liability will be settled at 2%, as the Foundation expects to meet the requirements prescribed by IRS Section 4940(e).

Distribution Requirements—The Foundation is subject to the distribution requirements of the Code. Accordingly, within one year after the end of each fiscal year, it must distribute 5% of the average market value of its assets as defined in the Code. The Foundation has complied with distribution requirements through November 30, 2005 and 2004.

4. Investment and Administrative Expenses

The classification of expenses between investment and administrative (grant-related) activities is determined by either specific identification of the expense or by an allocation based on management estimates. The classifications for 2005 and 2004 are as follows:

	2005			2004		
	Investment	Administrative	Total	Investment	Administrative	Total
Salaries and staff benefits	\$ 390	1,872	2,262	\$ 364	1,742	2,106
Investment management	2,899	—	2,899	2,737	—	2,737
Program management	—	799	799	—	673	673
Consulting fees	7	671	678	13	527	540
Other administrative expenses	179	899	1,078	164	805	969
	<u>\$ 3,475</u>	<u>4,241</u>	<u>7,716</u>	<u>\$ 3,278</u>	<u>3,747</u>	<u>7,025</u>

5. Pension Plan

The Foundation has a defined contribution pension plan whereby individual annuity contracts with Teachers Insurance and Annuity Association of America and College Retirement Equities Fund are purchased for all qualified employees. The amount of the contribution is equal to 10% of the employee's salary up to the Social Security income limit and then 15% of the employee's salary up to a maximum salary of \$210. The expense of the plan for 2005 and 2004 was \$193 and \$179, respectively.

6. Grants Payable

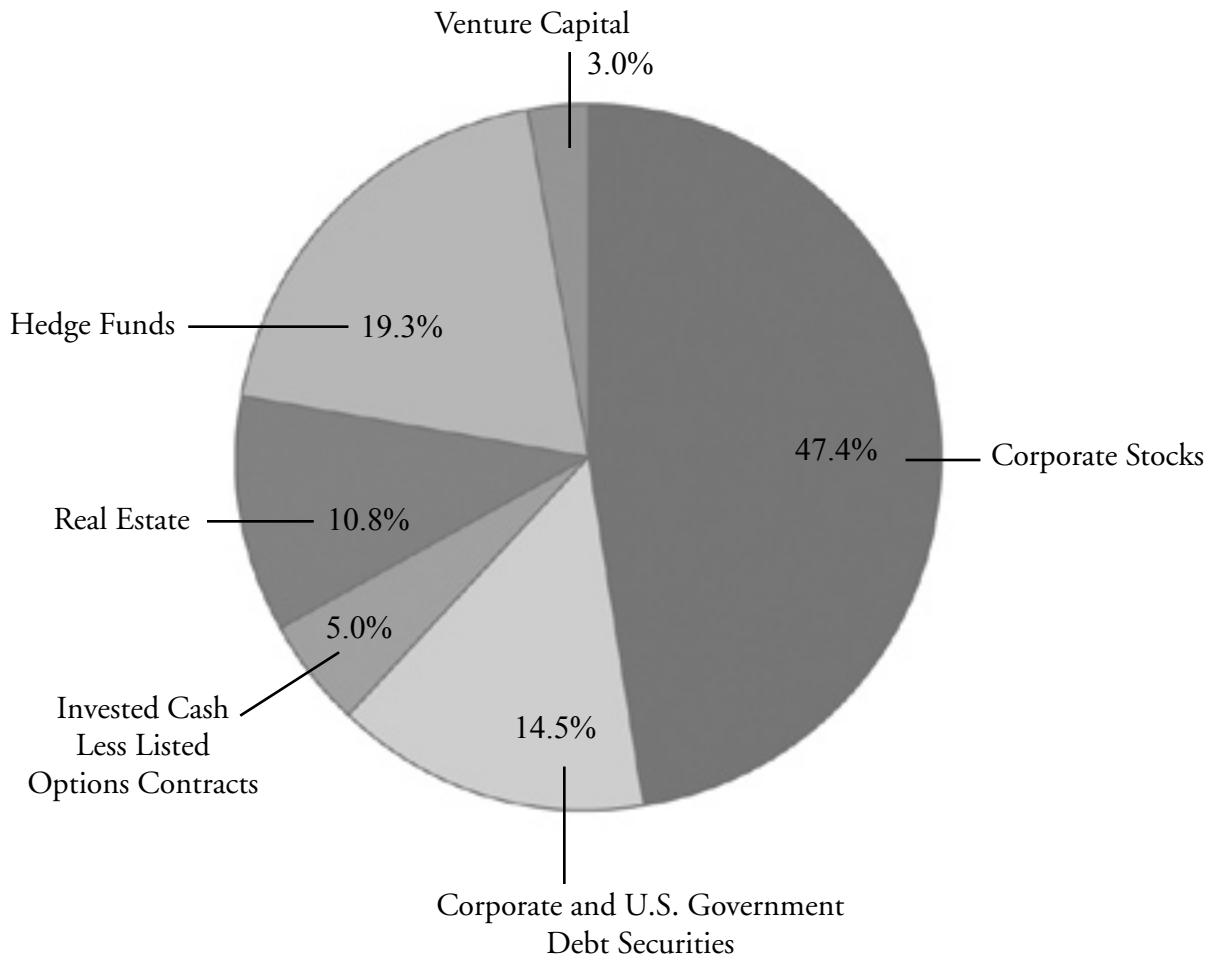

The following table provides the activity within the unpaid grants account:

	2005	2004
Unpaid grants at beginning of year	\$ 21,408	24,521
Grants appropriated, net of cancellations	31,981	27,774
Grants paid	(30,364)	(31,047)
Refunds of previous years' grants	640	160
Unpaid grants at end of year	<u>\$ 23,665</u>	<u>21,408</u>

Grants payable in more than one year are stated at fair value. Fair value is determined as the present value of estimated future cash flows using discount rates ranging from 2.5% to 5%. The following is a summary of grants authorized and payable at November 30:

	2005	2004
To be paid in less than one year	\$ 16,014	14,897
To be paid in one to five years	8,444	7,067
	24,458	21,964
Discount	(793)	(556)
	<u>\$ 23,665</u>	<u>21,408</u>
